

SAYANTAN MAJI
B.Tech. - Computer Science & Engineering
Ph: +91-9002761536
Email: sayantanmaji2005@gmail.com
Haldia, West Bengal, India - 721657

PROFESSIONAL SUMMARY

Self-motivated learner with a strong commitment to continuous skill development through online learning platforms. Actively enhances problem-solving abilities by practicing on various coding and programming platforms. Demonstrates curiosity and initiative in exploring modern web technologies and development tools. Continuously works on improving technical knowledge and applying learned concepts to practical projects in software and web development

KEY EXPERTISE

c java MongoDB HTML 5 css javascript

EDUCATION

Haldia Institute Of Technology B.Tech. - Computer Science & Engineering CGPA: 7.13 / 10	2023 - 2027
RADHAMOHANPUR VIVEKANANDA HIGH SCHOOL(H.S.), Medinipur 12 th WBCHSE Percentage: 64.80 / 100	2023
RADHAMOHANPUR VIVEKANANDA HIGH SCHOOL, Medinipur 10 th WBBSE Percentage: 92.60 / 100	2021

INTERNSHIPS

AI For Everyone | IT / Computers - Software
AI Builder Intern 23 Mar, 2026 - 09 May, 2026

Key Skills: Artificial Intelligence Machine Learning Prompt Engineering Generative AI ChatGPT Claud Ai

I am Sayantan Maji. Successfully completed the AI for Engineers training program at AI For Everyone and earned the Certified AI Builder – Level II certification. Gained practical experience in designing, building, automating, and deploying AI-powered workflows and applications. Developed skills in AI solution design, prompt engineering, workflow automation, innovation, and solving real-world engineering problems using artificial intelligence technologies.

CDAC | IT / Computers - Software 05 Jan, 2026 - 30 Jan, 2026

Key Skills: HTML5 React.js Javascript MongoDB CSS Express.js Node.js

My name is Sayantan Maji, and I am a Computer Science and Engineering (CSE) student with a strong interest in full-stack web development. I am currently learning and working with the MERN stack, which includes MongoDB, Express.js, React.js, and Node.js. The MERN stack allows developers to build complete web applications using JavaScript for both frontend and backend development. Through this technology, I am developing skills in building dynamic, responsive, and scalable web applications. My goal is to improve my development skills and build innovative projects that solve real-world problems.

PROJECTS

Labintel(Ai lab report manager)

23 Mar, 2026 - 09 May, 2026

Mentor: Soumyajit Das | Team Size: 10

Key Skills:

React.js

Vite

Tailwind CSS

React Router

Node.js

Express.js

Groq AI

Llama 4 Vision

Google Gemini

OCR

Prompt Engineering

Supabase

Twilio

PostgreSQL

Google Cloud Text-to-Speech

Project Link: <https://labintelorg.vercel.app/lab/secondlab/login>

LabIntel is a comprehensive, AI-powered diagnostic laboratory management and patient engagement SaaS platform. It bridges the communication gap between medical labs and patients by providing two isolated, highly secure portals: a Staff Admin Dashboard and a Patient Portal. Medical staff can upload raw laboratory test reports (such as Complete Blood Counts), which the platform processes automatically. Using advanced Vision AI and Optical Character Recognition (OCR), the system seamlessly extracts complex clinical biomarker data from these uploads. A secondary LLM engine then analyzes the data to instantly generate a 9-section, patient-friendly health summary identifying diseases, abnormal values, and dietary tips. To ensure maximum accessibility, the platform uses a Voice Synthesis engine to read a compassionate, 30-second conversational Hindi (Hinglish) audio summary to the patient. Patients securely access their records via a seamless, passwordless SMS OTP login flow. Once logged in, patients can view their historical health trends on visual graphs and read their AI-simplified insights without needing medical jargon. The lab administration side includes robust tools for patient management, staff role tracking, and automated alerts for critical or worsening patient test values. Ultimately, LabIntel modernizes the clinical experience, delivering a "Gold Standard," empathetic, and highly automated diagnostic delivery system.

Online-Book-Store-main

05 Jan, 2026 - 28 Jan, 2026

Mentor: CDAC | Team Size: 10

Key Skills:

Express.js

Node.js

React.js

Javascript

HTML5

MongoDB

CSS

Project Link: <https://bookstore-iota-three.vercel.app>

The Online Book Store is a web-based application designed to provide a convenient platform for users to search, browse, and purchase books online. It allows customers to explore a wide range of books across different categories such as fiction, academic, technology, and more. Users can create an account, log in securely, and manage their personal profiles. The system provides detailed information about each book, including title, author, price, and description. Customers can add selected books to a shopping cart and proceed to checkout for purchasing. The application includes secure authentication and basic payment processing features. An admin panel is provided to manage book inventory, update prices, and add or remove books from the catalog. The system also enables administrators to monitor orders and manage customer data efficiently. This project demonstrates key concepts of web development such as database integration, user authentication, and dynamic content management. Overall, the Online Book Store improves accessibility and efficiency in buying books through a digital platform.

PERSONAL INTERESTS / HOBBIES

- Football, Drawing
